3CX SITEMASTER BACKHOE LOADER

Having one machine which can do the work of a site dumper, an excavator and a forklift, as well as getting itself to site means you can save costs by reducing the number of machines on site.

The 3CX Sitemaster features a high performing 55kW engine, providing high torque with maximum efficiency. This makes it the ideal site machine with benefit of seat mounted excavator controls for optimum ease of use and controllability.

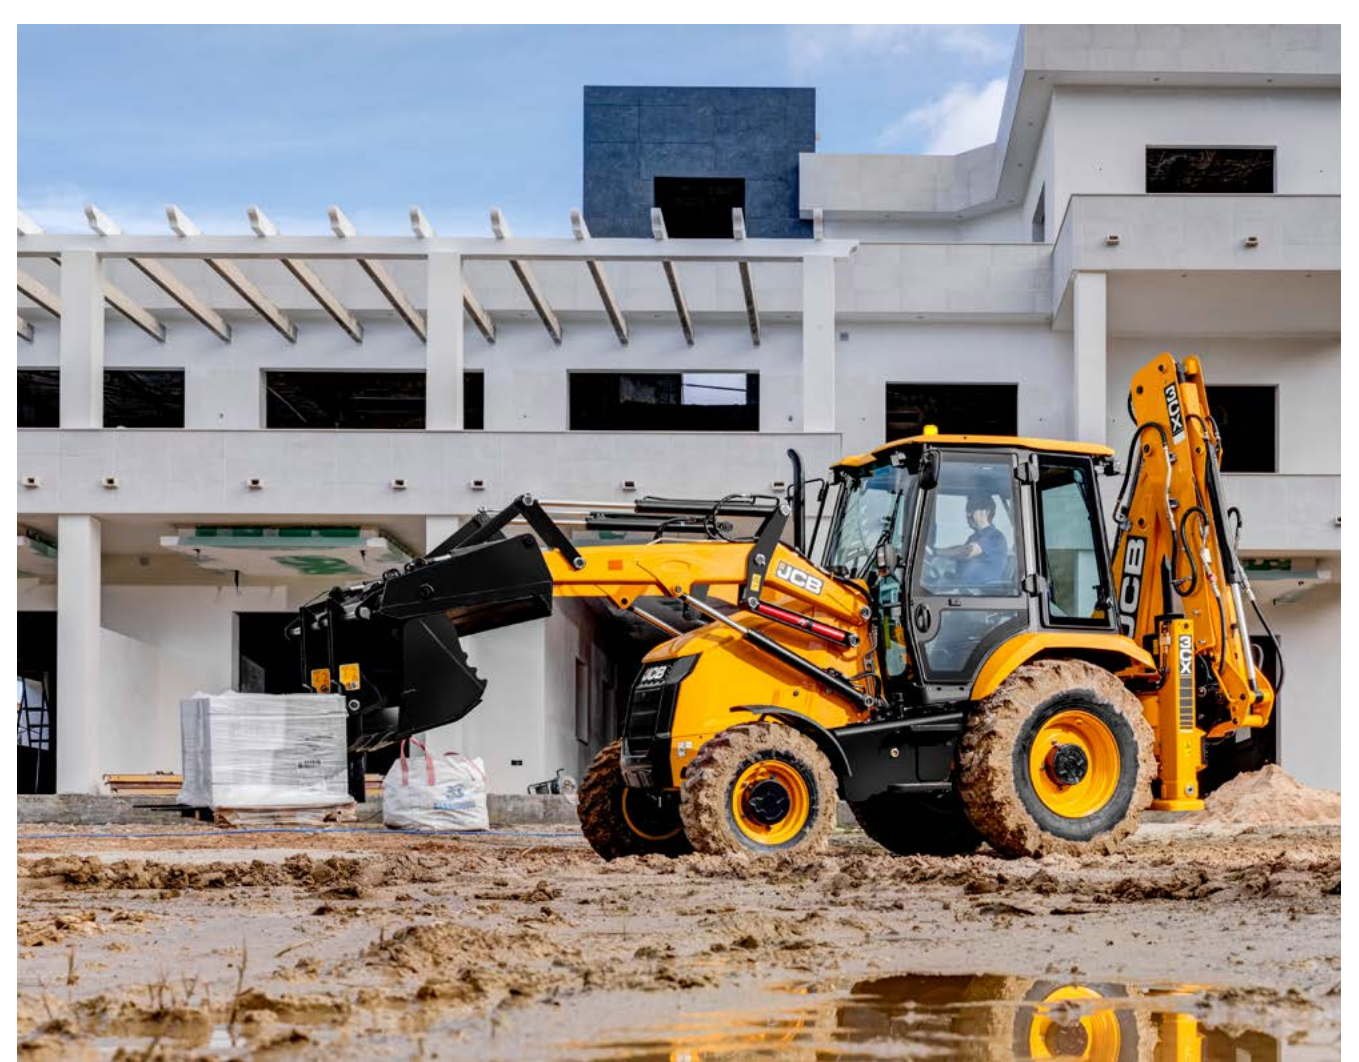

LOADING MADE EASY

Load a lorry in under 5 minutes using the F-N-R switch to quickly change machine direction and Return to Dig feature to automatically reset the shovel to level.

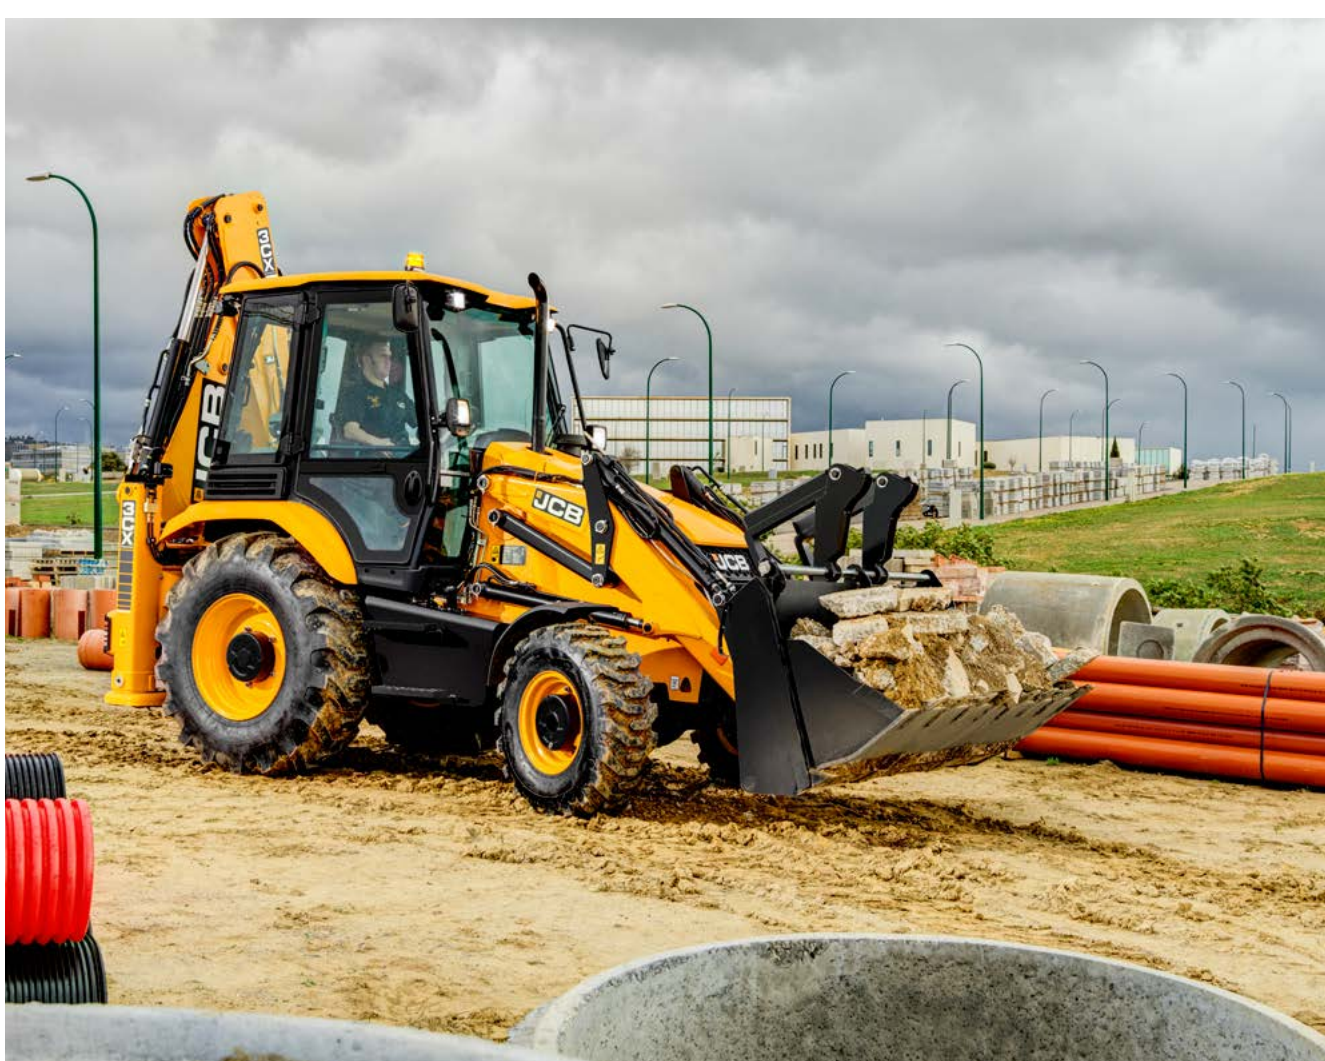

ULTIMATE VERSATILITY

The 6-in-1 shovel with the addition of flip over pallet forks maximises productivity, allowing the machine to grade, grab, pick and place.

ROADING MADE EASY

Drive to site with no transport costs. Travelling up to 40kph with smooth ride system providing a comfortable roading experience.

OFF-ROAD PERFORMER

Off-road, enjoy fast movement around site compared to tracked machines with less damage to kerbs and roads.

EXCAVATING MADE EASY

Excavate up to 150 tonnes per hour with the capability to fit large capacity buckets up to 0.48m³, while an extending dipper enables 5.65m dig depth.

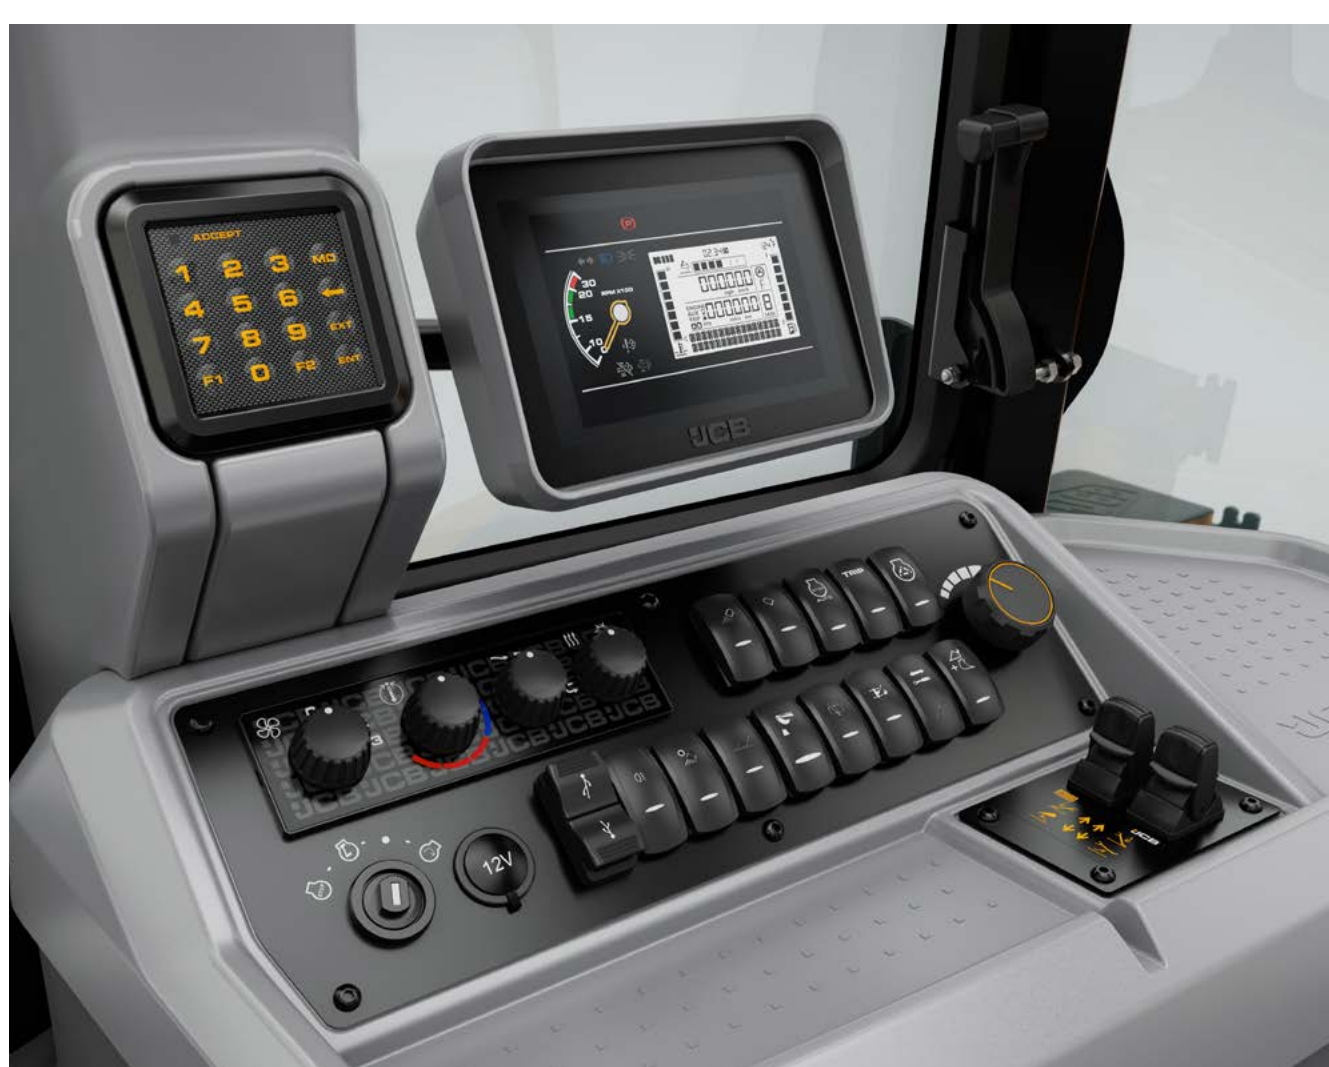

PRODUCTIVE PERFORMANCE

Multifunction with one machine by using an excavator mounted breaker alongside the loader shovel to quickly break and move material with no attachment changeover.

COMFORT MADE EASY

A spacious cab featuring ergonomically designed seat mounted servo excavator controls for maximum operator comfort and effortless control throughout the day.

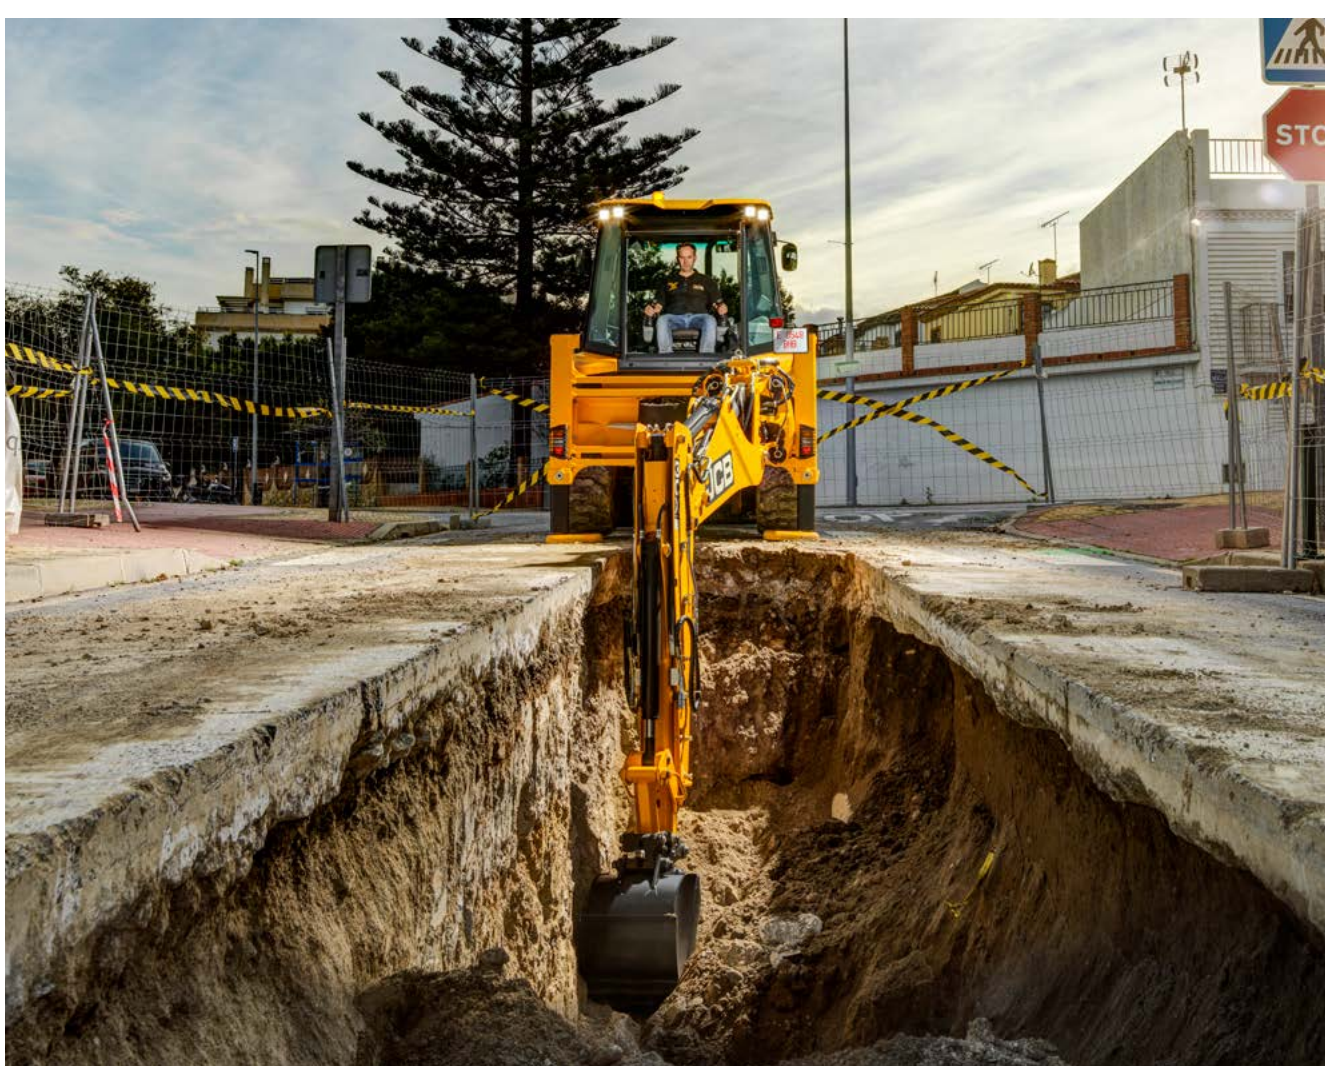

EASY TO USE

LCD display screens provide the operator with clear, real time information, while the advanced HVAC system ensures a comfortable operating environment in all conditions.

HIGHWAYS MADE EASY

Reduce highways fleet complexities and travel from depot to site at up to 40kph. Handle excavating and loading with ease, allowing road crews to respond faster, keeping road networks moving safely.

UTILITIES MADE EASY

A compact footprint and servo control are ideal for work in urban utility applications. Compatible with a range of attachments, perfect for all utility jobs, ensuring minimal disruption to communities without compromising on efficiency.

MACHINE SPECIFICATION

MODEL		3CX SITEMASTER
Engine	L	JCB 3.0
Power	kW	55
Torque	Nm	440
Transmission		4-speed dual synchro manual
Excavator	ft	14 ExtraDig
6-in-1 shovel	m ³	1
Wheels	inches	18 front, 26 rear
Speed	kph	40
